

case study

Faber Blinds UK Ltd

working in
partnership with

office solutions.com

“I was extremely pleased with the speed of installation of our new furniture. The reception upgrade has been a huge improvement and now matches the prestigious image that Faber Blinds UK has earned. In fact, we were so impressed that we asked acs to immediately carry out phase two of our refurbishment. They have continued to maintain the high standard that we have come to expect of them.”

Kevin Barford, Finance & Administration Director

The Requirement

Faber Blinds is acknowledged in the blind industry to be a market leader in its field. Faber's Contracts and Retail Divisions required reorganisation to provide an improved layout and more space. There were also eight offices that needed space planning, to allow for relocation of some employees, giving each the appropriate usable space. Finally, the reception area needed modernising and uplifting, to reflect the success of the business. The various projects were to be carried out over a period of about one year and flexible delivery and installation dates were essential, to avoid disruption to the business at critical times.

The Solution

acs office solutions has been supplying IT solutions and support and furniture to Faber Blinds for over six years and was the obvious first port of call. Each project required an accurate site survey and discussion about existing and projected storage needs. **acs's** Interior Design team then produced CAD drawings, taking into consideration Health and Safety regulations. These were presented to and reviewed with the staff of Faber Blinds and fine tuned, following which the selected furniture was ordered, delivered and installed. The reception area included a plush wood veneer counter and matching bespoke cupboard and a special unit for necessary items that needed to be discreetly hidden.
